

FRACKING EXPOSED: A State of Emergency

PROTEST AT THE Y.O.U.N.G. EXPO

Let's "expose" the natural gas industry's first Ohio "expo" for its half-truths & propaganda.

Ohio is a state in emergency right now.

November 30, 2011

Youngstown, OH

4,000 horizontal fracked wells are expected in Ohio in the next 4 yrs. In PA, 3,000 wells have already been drilled. Results so far - drinking water polluted with toxic fluids and radioactivity; roads ruined; explosions and fires; uncontrolled releases of frack fluid; quiet communities disrupted; and local economies sacrificed to the boom/bust cycle.
